TAMPER EVIDENT SECURITY TAPE

- Proprietary two-layer tape clearly communicates positive evidence of attempted tampering while keeping the package sealed.
- Tape performance is sensitive to the surface it is applied to – testing must be done and approved to confirm application is suitable for use.
- Corrugated paper quality varies widely and must be tested thoroughly for use. We recommend a minimum of 15 minutes dwell time. Increased dwell time will allow the adhesive and paper to bond.
- Testing has determined that high quality paper with low recycle content along with certain types of white corrugated material work best in box applications.
- This tape can be produced in label format with a liner or can be perforated on a roll in a self-wound format.
- Tape can be lock printed with limitations to size, color and location of print.
- 2,700 sqm minimum to print with a 10% surcharge – above 10,000 sqm printing is done free of charge.
- Numbering or dating can be ink jet printed on the adhesive side.
- Machine rolls available in standard 2” x 547 yd. length.
